## Press release

Neuchâtel, 18 October, 2011

### **Colibrys consolidates its presence in Russia**

**Neuchatel, Switzerland: Colibrys has appointed Aviton as new distributor to better serve the growing and dynamic Industrial and Instrumentation Russian market as well as the numerous avionic requirements.**

Advanced MEMS accelerometers are increasingly used in the wide range of Mil/Aerospace and high end Industrial and Instrumentation applications and starting to replace traditional expensive electro mechanical solutions. A large number of applications such as automation, robotics, general testing, structure monitoring, avionic or Geophysics, to name a few, are taking advantage worldwide of our products and the Russian market represents another real opportunity for our future growth.

To represent all our accelerometer products and especially our products dedicated to Industrial and Instrumentation applications such as the VS9000 family designed for vibration and shock measurements or the latest MS9001 product, recently released and dedicated to tilt applications, the company Aviton has been appointed as new distributor in Russia.

“Aviton has the experience and the local network required to distribute efficiently our products and will complete advantageously our current offer made to the Russian customers”, says Bahram Arbab, Sales director for Europe and Asia at Colibrys.

For this reason, we are pleased to welcome on board our new partner and to carry on our sales forces development in Russia through Aviton who is another ideal associate for us in this large territory.

#### **About Colibrys**

COLIBRYS is a world-leading supplier of standard and semi-custom MEMS based motion sensors to the harsh-environments (Military, Aerospace and Energy) and safety critical (Industrial and Instrumentation) applications. COLIBRYS family of motion sensors includes extremely low noise, shock resistant seismic sensors, high stability shock tolerant inertial and shock accelerometers tilt sensors as well as DC coupled capacitive vibration sensors. COLIBRYS is based in Neuchâtel, Switzerland. Additional information is available at [www.colibrys.com](http://www.colibrys.com).

#### **About Aviton**

AVITON has been successfully working on the electronic components market since 1998, being one of the leading suppliers of a wide range of production for the following directions: Compact DC motors and high precision drives, Switching power supplies, Components for automation, the whole variety of electronic components.

Direct interaction with foreign partners allows us to offer competitive prices and guarantee performance of our engagements at every step of purchasing process.

AVITON works efficiently with enterprises of different fields, including such high technological branches as space and aircraft, medical equipment, robotics and mechatronics, electronic equipment manufacturing, automation and telecommunication systems, MIC (Military-industrial complex). AVITON is the part of the holding company RCM Group (Russian Contract Manufacture Company) since 2005. The group of companies, JSC Abris SPb, Abris Technology Ltd., JSC Aviton (members of RCM group holding) have ISO 9001:2008 certificate.
